the 17 sustainable development goals sdgs have been agreed globally in an unprecedented ambitious and innovative agenda for prosperity and peace for people and planet this book provides a roadmap for achieving the paradigm shift to achieve the sgds from an educational perspective

this paper was commissioned under the auspices of the un inter agency network on racial discrimination protection of minorities co hosted by the office of the high commissioner for human rights responding to the call made by un secretary general antónio guterres as part of his 2021 initiative our common agenda it was developed through multiple interventions and consultations with members of

the inter agency network it was launched at a meeting hosted at the united nations university of peace in costa rica in december 2022 commemorating the 30th anniversary of the united nations declaration on the rights of persons belonging to national or ethnic religious and linguistic minorities it seeks to identify a series of urgent actions including the passage of a security council resolution on minorities and a number of other key steps to galvanize coordinated actions within the united nations in what the paper identifies is likely to be the most violent quarter of the century since the united nations was founded

this book presents current progress on challenges related to big data management by focusing on the particular challenges associated with context aware data intensive applications and services the book is a state of the art reference discussing progress made as well as prompting future directions on the theories practices standards and strategies that are related to the emerging computational technologies and their association with supporting the internet of things advanced functioning for organizational settings including both business and e science apart from inter operable and inter cooperative aspects the book deals with a notable opportunity namely the current trend in which a collectively shared and generated content is emerged from internet end users specifically the book presents advances on managing and exploiting the vast size of data generated from within the smart environment i e smart cities towards an integrated collective intelligence approach the book also presents methods and practices to improve large storage infrastructures in response to increasing demands of the data intensive applications the book contains 19 self contained chapters that were very carefully selected based on peer review by at least two expert and independent reviewers and is organized into the three sections reflecting the general themes of interest to the iot and big data communities section i foundations and principles section ii advanced models and architectures section iii advanced applications and future trends the book is intended for researchers interested in joining interdisciplinary and transdisciplinary works in the areas of smart environments internet of things and various computational technologies for the purpose of an integrated collective computational intelligence approach into the big data era

cancer dementia and cardiovascular disease are responsible for almost two million deaths each year in the united states alone and represent the largest immediate threat to humanity over the last century we have made spectacular advances that have transformed our society splitting the atom space travel telecommunications and the internet but with medical research focused mostly on science for the sake of science it has yielded precious few cures a roadmap for curing cancer alzheimer s and cardiovascular disease represents a first of its kind effort to address both the reasons for this and to posit solutions to fix our broken system in an effort to finally end this cure crisis dr marangos draws on 45 years of experience in every aspect of the biomedical r d field from basic drug discovery research at the nih to the co founding of five drug companies he has published 252 research papers and edited four books on drug discovery is co inventor on 14 patents and founded the journal of molecular neuroscience he argues that from a development perspective the regulatory patent and legal hurdles that force industry to pursue so called me too drugs rather than cures for terminal diseases must be re thought leadership accountability strategy focus and urgency need to be re evaluated and major reforms to the nih fda and patent codes are proposed to remedy these impediments to cures written for anyone frustrated with the seemingly endless threat of terminal disease this book seeks to inform energize and provide the rationale for the public and industry stakeholders as well as clinicians and researchers to resurrect the physician patient relationship and demand that we get serious about ridding society of this scourge on humanity this work contains the views and opinions of the author and are in no way intended to harm the reputation of any person agency organization or commercial entity discussed herein cureterminaldisease com first comprehensive analysis of the failures in curing cancer alzheimer s and cardiovascular disease with solutions proposed defines deficiencies in academic life science research including conflicting incentives qa qc issues and how to fix them provides a rationale for fda reform especially as it relates to terminal disease drugs details how a reformed nih regulators and industry can partner to form a nasa type effort to speed cures of terminal diseases provides the first detailed roadmap for life science researchers to conquer terminal disease

a roadmap for couple therapy offers a comprehensive flexible and user friendly template for conducting couple therapy grounded in an in depth review of the clinical and research literature and drawing on the author s 40 plus years of experience it describes the three main approaches to conceptualizing couple distress and treatment systemic psychodynamic and behavioral and shows how they can be integrated into a model that draws on the best of each unlike multi authored texts in which each chapter presents a distinct

brand of couple therapy this book simultaneously engages multiple viewpoints and synthesizes them into a coherent model covering fundamentals and advanced techniques it speaks to both beginning therapists and experienced clinicians therapists will find a roadmap for couple therapy an invaluable resource as they help distressed couples repair and revitalize their relationships

at a time of geopolitical tension and mutual distrust the united states and russia must work together in those areas where coordination is critical to global security both to help stabilize the relationship and to buffer against conflict in the future the analyses in this volume examine prospects for russia u s cooperation in several crucial regions and fields economics energy the arctic euro atlantic security the middle east strategic stability cybersecurity and countering terrorism and extremism they offer concrete actionable recommendations in each area

a roadmap for the comprehensive assessment of natech risk management and control of technological accidents triggered by natural hazards in the framework of climate change covers the latest advancements concerning the quantitative risk assessment and the management of cascading events involving technological accidents caused by natural hazards these complex events are called natech accidents and their management and control are recognized as paramount priorities to enhance the resilience of critical infrastructures and in particular of chemical and process facilities in the framework of adaptation to climate change the topic is introduced providing the description of past accidents case studies and quantitative figures allowing the identification of the most vulnerable plant elements of the complex features of accident scenarios and of their rising trend possibly related to factors as climate change and growing industrialization a state of the art of the available approaches to the assessment and management of natech risk is provided advanced methodologies supporting a holistic approach to the assessment of scenarios driven by natural hazards are presented enabling the identification and analysis of peculiar accident dynamics in particular the possible performance degradation of utilities and safety systems available on the sites and its role in accident initiation and escalation is addressed methodologies aiming at the assessment of the actual performance of safety barriers and safety systems during or immediately after the impact of a natural event are presented recent tools and data supporting the quantitative assessment of these features in the overall assessment of natech risk are reported highlighting the similarities with other typologies of cascading accidents several case studies are presented in the book and each methodology presented is provided with an illustrative case study providing guidance to its application provides user friendly description of methodologies suitable for the application to complex industrial problems includes worked case studies to explicitly drive the application of the proposed methodologies offers state of the art available tools to perform the assessment of natech risk to provide a quick toolbox to be applied to complex industrial problems

we hear every day about the flashy twenty five year old wunderkinds who have hit it big in the tech world and celebrated ceos who have flourished in public companies but we rarely hear about the majority of successful men and women who at the average age of forty one start their own company the author was forty when he founded homax corporation in 1981 he is an eclectic award winning entrepreneur who would like to share what he learned in business and life with others he sold his company in 1996 which was thoughtfully structured to be sustainable for talented management who continued growing the company it was purchased by ppg july 2 2014 a roadmap for bootstrapping entrepreneurs the power to control your future is a book that echoes the words of st francis of assisi start by doing what is necessary then what is possible and suddenly you are doing the impossible this story shows young entrepreneurs how to plot their course to succeed in business and life by building cultures with good character while simultaneously growing themselves it also speaks to the middle aged start up entrepreneur about how to assess risk and how to focus their courage to begin all proceeds from the book sales will be dedicated to a scholarship fund praise for a roadmap for bootstrapping entrepreneurs wow what a book the experiences quotes quick short chapters make this a must read for college business classes this is truly spectacular now i know why it took so long to write just like your skiing racing and business execution everything is carefully thought out and reviewed when you think of all the experiences woven into the book you have to say it is one remarkable story james galbreath managing director nwq investments first of all i felt you wrote the book just for me i learned a ton reading it it felt like a love letter from someone who is like a dad figure i found so many pages with valued lessons that should be incorporated in daily life and personal life as well as business life ellen rossi bod member alta ski area i am reading the book for the third time and

continue to be amazed at what you put together in those pages each chapter has insights and advice for aspiring entrepreneurs that could only come from someone who has been there and done that you have written a graduate level curriculum for entrepreneurship providing the framework for such a course at any business school one thing that also came out was your devotion to treating people with honesty integrity and fairness david sanctuary mba continental airlines director of the boeing 757 767 flight standards and training thank you for the opportunity and privilege of reviewing your book i thoroughly enjoyed the exercise many things in the book resonate with me remind me of lessons learned and lessons observed mark neporent coo senior legal officer cerberus capital

a roadmap to non hematopoietic stem cell based therapeutics from the bench to the clinic is a resource that provides an overview of the principles of stem cell therapy the promises and challenges of using stem cells for treating various clinical conditions and future perspectives the overall goal is to facilitate the translation of basic research on stem cells to clinical applications the properties of stem cells from various sources are reviewed and the advantages and disadvantages of each for clinical use are discussed modifying stem cell properties through preconditioning strategies using physical chemical genetic and molecular manipulation to improve cell survival increase cell differentiation potential enhance production of paracrine factors and facilitate homing to the site of injury or disease upon transplantation are reviewed various routes of stem cell administration and dosing and the duration of effects are explored individual chapters are written by experts in the field and focus on the use of stem cells in treating various degenerative diseases autoimmune diseases wound healing cardiovascular disease spinal cord injury oral and dental diseases and skeletal disorders finally experts in the regulatory arena discuss mechanisms used in different countries for approving the use of stem cells to treat diseases and many common issues that are typically encountered while seeking approval for this class of therapeutic agent offers advanced students as well as new researchers an overview of the principles of stem cell therapy discusses a wide array of pressing clinical issues with stem cell based therapies so that new ideas in the laboratory can be efficiently translated to the clinic through better designed clinical trials helps clarify current regulatory mechanisms so that the safe use of stem cells for treating a variety of diseases can move forward fosters cross disciplinary dialogue between research scientists and physicians to accelerate the safe implementation of efficacious cell therapies

this book discusses how bioethics can be advanced and expanded it explores the possibility to find an approach to bioethics that covers all one health approaches i e one health ecohealth planetary health or one welfare each with their holistic and diverse perspectives although some attempts exist to find such an ethics of one health this is still very much novel ground from an analysis of the nature of scientific aims and goals of one health approaches this book describes and expands on the variety of ethical issues that emerge in this context analyzing previous attempts to establish an ethics of one health this book shows that the complexity is greater than what is sometimes suggested some issues might be solved using a more traditional perspective on bioethics but other issues need a new take on bioethics this book analyses what is needed for a pluralistic ethics that covers different species humans animals plants as well as different levels individual population ecosystem it discusses whether it is possible to find a bridge between versions of anthropocentric zoocentric biocentric and ecocentric ethics also due to the trans and interdisciplinary nature of one health approaches it discusses how this ethical framework will relate to different value and ethical systems around the globe as a result this book is a roadmap for future discussions and research in this emerging field proposing an ethical framework for one health approaches

our heart s desire is that you find the truth the truth about the lord jesus christ everything has been made by and for him his kingdom is at hand and is available for reconciliation restoration and healing jesus teaches us to pray your kingdom come your will be done on earth as it is in heaven matt 6 10 he would not teach us to pray like this if he was not making his kingdom available here and now god has called anointed appointed and is equipping exodus to bring freedom to the captives furthermore he is not just setting people free he has also promised to bring them into his abundant life a land flowing with milk and honey this manual has been developed and engineered to help you and your helper s to have a road map for the way out of captivity to drugs alcohol sexual immorality the love of money gambling bitterness rage gluttony gossiping or any other sort of habitual idolatry so that you can be released to walk in your true identity
